MODEL XS

The Geneva Sound System Model XS is the world's first portable audio system with true Hi-Fi sound. Inspired by the classic travel clock, it comes in a sturdy leather-like clamshell case that flips open to deliver rich and detailed sound. Closed, it's a stylish accessory small enough to slip into any briefcase.

Specifications

- 2.1 speaker system with two 1" tweeters and one 2¼" woofer
- Bluetooth for wireless audio streaming
- When in Bluetooth and Line-in mode powered by digital amplifier for optimal audio performance; when in FM mode powered by analog amplifier for optimal radio reception
- Each speaker individually powered and chambered for accurate acoustics
- Rechargeable lithium battery with more than 5 hours play-time
- Digital FM radio tuner with auto search function
- Digital clock with alarm
- LED display for volume/mode/frequency
-
- TouchLight controls – backlit, touch-sensitive
- Stereo mini line-in jack for external audio

MODEL S WIRELESS

The new Model S Wireless offers even more: completely re-engineered components, higher-grade electronics and speaker drivers for even more impressive sound, and the convenience of instant wireless connectivity. It introduces innovations that make Hi-Fi easier and more eye-pleasing: TouchLight controls, Bluetooth 2.1 A2DP: for high quality wireless audio streaming, and a digital clock radio. TouchLights brighten on contact, giving extensive iPod menu control no competitor provides. The new Model S Wireless is the perfect companion to today's smart phones and tablets making wireless home audio simple and beautiful.

Specifications

- Two full-range 3" drivers
- Two bass ports with dynamic loudness
- Two Class D digital amplifiers – extremely efficient, low-power consumption
- Digital FM radio with 6 presets
- Analog Audio in: 1 x stereo mini line-in with 3.5 mm (1/8 inch)
- Bluetooth 2.1 A2DP: for high quality wireless audio streaming
- Digital clock with alarm
- LED display for volume/mode/frequency
- TouchLight controls – backlit, touch-sensitive
- Remote control
- Table stand in brushed aluminium finish

MODEL M WIRELESS

The Model M Wireless is a complete bookshelf sized stereo system crafted in a single cabinet made out of piano-lacquered wood. The compact system houses two separate Hi-Fi speakers and uses patented technology to deliver true stereo imaging. Driven by a powerful digital amplifier, it delivers an audio performance that competes with much larger conventional Hi-Fi systems.

The Model M Wireless is able to exploit the superior audio potential of DAB and Bluetooth A2DP streaming to generate an enriched listening experience from digital music collections and online sources through suitably equipped smartphones, tablets and PC's.

Specifications

- Two 1" tweeters
- Two full-range 4" woofers - two bass ports
- Each speaker individually powered and chambered for accurate acoustics
- Four powerful Class D digital amplifiers – extremely efficient, low-power consumption
- FM RDS radio with 6 presets
- LED display
- Stereo mini line-in jack for external audio
- Remote control
- Digital clock with alarm
- TouchLight controls – backlit, touch-sensitive
- Bluetooth 2.1 A2DP
- Digital Radio – DAB and DAB+ standards
- Optional floor stand in brushed aluminium finish

Demand from TV users for better sound and space economy has allowed Geneva to flex its world-famous audio design capability, with the Model Cinema, a high-end TV sound system/stand, enhanced by the brands accurate, size-defying sound quality, minimalist aesthetics, and immaculate construction.

All the virtues that have propelled Geneva to the super-league of home entertainment design are powerfully resolved. From a stylishly neutral matt white or black cabinet under the control of a simple and intuitive aluminium remote handset, Model Cinema integrates advanced digital processing technology with exemplary audio engineering and smart connectivity to develop a superior sound-base, wider in both capability and audio coverage.

Specifications

- Four full-range 2" woofers
- One 5¼" subwoofers
- Five powerful Class D
- Digital signal processing (DSP) with proprietary algorithms optimized for TV and Movie audio
- Three different audio inputs for audio from TV:
 - Analog audio (2 RCA connectors)
 - Digital audio (optical) with TOSLINK
 - Digital audio (coax), RCA connector
- Bluetooth 2.1 A2DP for wireless audio streaming
- LED display
- Aluminium Remote control
- Your TV can be placed on the Model Cinema
